GAINESVILLE PLANT
FACILITIES MAINTENANCE MECHANIC

Interviewing and Hiring immediately

KIK Gainesville- located in the Gainesville, GA procures, blends, fills and packages a wide variety of aerosol and liquid personal care products.

We are immediately searching for an experienced **Facilities Maintenance Mechanic** to perform Liquefied Petroleum Gas (LPG) and Bulk Chemical Tank Farm, Compounding & Plant Support Equipment Maintenance & Repair.

Daily Responsibilities:

- Safe & proper operation of:
 - LPG & chemical handling equipment in the tank farm & LPG supply equipment to gas houses
 - Plant support equipment such as Boilers, Compressors, Vacuum Pump
 - All chemical pumps & other compounding support equipment
 - CO₂ pumping & storage system
 - Lead or assist in general facilities maintenance tasks
- ◆ Perform LPG unloading from drop trailers, changeover from bulk tanks, drop trailers, manifolds, high pressure pumps & gas houses
- ◆ Perform LPG blending operation using load cell based weighing system
- ◆ Repair & maintain LPG, chemical & misc. other types of pumps
- ◆ City water/sewer, compressed air, chemical & high pressure plumbing & repair
- ◆ Compounding equipment repair & maintenance
- ◆ Stick, MIG, TIG welding on various projects
- ◆ Maintenance of air compressors, compressed air storage, distribution & high purity filtration system.
- ◆ Maintenance of vacuum pumps & vacuum piping system
- ◆ Maintenance & repair of CO₂ pump, vaporizer & distribution piping
- ◆ Maintenance of low pressure steam boiler & steam distribution and condensate return piping system. Scheduling of boiler inspection & contract maintenance tasks.
- ◆ Maintenance & repair of city water & sewer plumbing in the plant
- ◆ First responders in case of emergency in the tank farm area
- ◆ Ensure integrity of propellant/chemical tank farm safety systems

Experience and Qualification Standards:

- ◆ Over five years' experience in a manufacturing environment such as a liquid filling & packaging plant or a chemical processing plant.
- ◆ Experience & understanding of the requirements for safe handling of high pressure liquids such as LPG & bulk flammable or reactive chemicals.
- ◆ Experience in basic operation & maintenance of centrifugal, positive displacement, diaphragm, reciprocating high pressure & liquid ring vacuum pumps
- ◆ Experience in operation & minor maintenance of low pressure natural gas fired steam boilers

- ◆ Experience in basic operation & minor maintenance of air compressors & compressed air distribution system
- ◆ Understanding of basic principles & methods of LPG, compressed air & steam piping.
- ◆ Familiarity with emergency response procedures
- ◆ Fork Lift drivers training
- ◆ Haz-Mat Training
- ◆ Gas House Safety System Training
- ◆ cGMP training
- ◆ Must pass Drug Test and Background Check

Physical Demands & Work Environment:

- ◆ This position is for shift work & the person is expected to be available to work 1st, 2nd or 3rd shift as needed. The primary shift assignment will be 1st shift.
- ◆ Person should be able to climb on extension ladders, work from elevated platforms, from top of elevated structures and from the articulating boom lifts as needed.
- ◆ Person should be able to reach tight & difficult to access areas
- ◆ This position requires up to 8 or more hours of standing on the feet & walking from job site to job site within the manufacturing plant as needed.
- ◆ This person should be able to lift 10-40 lb weight as needed.
